

SPEAKERS	SACHIN WAGH & HIMANSHU MEHTA (SYMANTEC)
SESSION TITLE	Hunting PBX for Vulnerabilities
SESSION QUICK ABSTRACT	Is your PBX secure? Have you ever thought what will be the impact on your business if you fail to secure it? Join us for live demonstration of multiple vulnerabilities present in different PBX vendors.
SESSION ABSTRACT	Our main motto of this session is to walk through the multiple vulnerabilities present in PBX that may possess threat to any individual or organization. This talk will demonstrate multiple exploitable security vulnerabilities including impact, attack scenario and mitigations that we came across while playing with different PBX. Hackers could explore the vulnerabilities to launch various security attacks and security professionals will learn how to mitigate against them. Our presentation will not be limited to the one, but many PBX vendors.
SESSION DETAIL	<p>A Live demonstration of vulnerabilities.</p> <p>It's always exciting to know how the hackers are finding new ways to gain access to your organization. Protection of the PBX is thus a high priority. Private Branch Exchange (PBX) is an essential component that supports the critical functions of your organization.</p> <p>In our talk, the following categories and demonstration will be included:</p> <ul style="list-style-type: none">➤ Vulnerabilities➤ Impact➤ Attack Scenario➤ Mitigation➤ Password Security <p>Failing to protect your PBX can expose your organization to loss of confidential information or financial damage. Most of the organizations which have implemented PBX are either unaware or ignore the security issues with PBX. The real key to effective security is to keep ourselves always updated. Once you understand the threat you are in a much better position to deploy security effectively.</p>
